

UMANG TALPARA

Backend-Focused Full Stack Developer | Node.js · NestJS · Microservices · AI-Integrated Systems
+91 97234 55615 • patelumang607@gmail.com • www.linkedin.com/in/umang-talpara • Ahmedabad, India

PROFESSIONAL SUMMARY

Backend-Focused Full Stack Developer with 4.5+ years of experience designing and scaling distributed systems, microservices, and REST APIs for high-traffic e-commerce, delivery, and HR-Tech SaaS platforms. Proven ability to lead development teams, own end-to-end backend architecture, and ship production-grade systems supporting 195K+ users and 4M+ orders. Actively leverages AI tools (ChatGPT, Claude, Cursor, Perplexity) to accelerate development and integrates LLM-powered features into product workflows.

TECHNICAL SKILLS

Backend	Node.js, Express.js, NestJS, TypeScript, JavaScript, API Security, Rate Limiting, JWT/OAuth
Databases	MongoDB, MySQL, Redis, Elasticsearch
Messaging / Queue	RabbitMQ, Kafka, Cron Jobs, Webhooks, Event-Driven Architecture
Frontend	Vue.js, Vuetify, React.js, HTML, CSS
Cloud & DevOps	AWS (EC2, S3, Lambda, SQS), CI/CD Pipelines, Jenkins, Vercel, Docker
AI & LLM Tools	ChatGPT, Claude AI, Cursor, Perplexity, Antigravity; LLM API integration in production workflows
Architecture	Microservices, System Design, Distributed Systems, Scalability, High Availability, Team Lead, Jira

PROFESSIONAL EXPERIENCE

- SproutsAI** — *Software Developer (Backend)*

Jan 2025 – Jan 2026 | California, USA (Remote)

 - Architected scalable backend microservices using Node.js, NestJS, MongoDB, Elasticsearch, and RabbitMQ for an AI-driven ATS SaaS platform handling 200M+ candidate profiles, with focus on system design, scalability, and fault-tolerant service architecture.
 - Built email automation engine with personalized outreach, retry logic, rate-limiting, and full tracking (sent, open, bounce) using event-driven architecture; enforced REST API best practices including JWT-based auth, input validation, and role-based access control (RBAC).
 - Integrated ATS platforms (Ashby, BambooHR, Lever, Keka) via REST APIs and webhooks for real-time candidate data sync.
 - Developed high-performance candidate search and filtering system using Elasticsearch, reducing recruiter search time significantly.
 - Leveraged AI tools (ChatGPT, Claude, Cursor) for code generation, debugging, and LLM-based feature prototyping within production workflows.
- Frendy** — *Full Stack Developer (Backend Lead)*

Dec 2021 – Jan 2025 | Ahmedabad, India

 - Led backend development of WMS, CRM, POS, and last-mile delivery platform; scaled to 195K+ users and 4M+ orders ensuring high availability, scalability, and zero-downtime deployments.
 - Designed and maintained 7+ microservices, 2 customer-facing apps, and 7 admin panels using Node.js, NestJS, Express.js, Vue.js, React.js, MongoDB, and MySQL.
 - Implemented Redis caching and query optimization strategies, improving API response times by up to 40%.
 - Led a team of developers; coordinated sprint planning, code reviews, and delivery milestones using Jira.
 - Used Sentry for real-time error monitoring and AWS services for cloud infrastructure and deployments.
- BinBytes** — *Full Stack Developer*

Feb 2021 – Nov 2021 | Rajkot, India

 - Built multiple client websites and admin dashboards with Node.js REST APIs and React.js frontends; delivered clean, maintainable full-stack codebases.

EDUCATION

B.Tech in Computer Science & Engineering — *Parul University* 2017 – 2021 | Vadodara, India

KEY HIGHLIGHTS

- ✓ Immediate Joiner ✓ Backend-Focused Full Stack Developer ✓ Microservices Expert ✓ Team Lead Experience
✓ AI-Augmented Development ✓ Production Systems at Scale ✓ Open To Relocation
